

The diagram illustrates the hierarchical structure of the 'SAL' database. It is organized into levels, with 'SAL' at the top. Below it are 'BAT' (Business Activity Types) and 'AT' (Activity Types) nodes. The 'BAT' nodes are further divided into 'BAT I', 'BAT II', 'BAT III', and 'BAT IV'. The 'AT' nodes are further divided into 'AT I', 'AT II', 'AT III', and 'AT IV'. The diagram shows the relationships between these nodes, including the 'ha' (has a) and 'l/dt' (labeled with date/time) attributes. The diagram is a complex network of nodes and edges, representing the hierarchical structure of the 'SAL' database.

UJLAK

Luas Areal	3,000.00 Ha
Lokasi	Basa IV Balai
